TereoPneuma Closes Seed Round

SAN DIEGO, CA September 24, 2013 - TereoPneuma, Inc., a CA based company developing the ReDe Mask™, today announced it has successfully closed its seed round to fund initial operations of the Company.

The funds will be used to develop the flagship product – ReDe Mask™ - a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation.

"We are pleased to be able to complete the private seed financing of TereoPneuma and to move forward with the research and development of the ReDe Mask™. We have structured TereoPneuma to be very lean so as to apply the majority of funds to product development." said William J. Mazzei, MD, CEO of TereoPneuma, Inc.

About TereoPneuma

TereoPneuma is a privately held medical device company in San Diego, CA whose mission is to develop novel high technology products in the field of anesthesia. TereoPneuma is Greek for "observe breathing". TereoPneuma's first product - the ReDe Mask™ - is a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation. Further, it provides a visual warning signal when no breath is detected for 7.5 seconds, and a more vivid visual warning signal when no breath is detected for 20 seconds. Detailed information on the Company is available at www.tereopneuma.com.
