TereoPneuma Presents the ReDe Mask™ at AORN 2016

SAN DIEGO, CA April 2, 2016 - TereoPneuma, Inc., a CA based company, has announced that the ReDe Mask™ will be exhibited at The Association of periOperative Registered Nurses (AORN) 2016 in Anaheim, CA on April 2-6.

The ReDe Mask™ is a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation. A three-color LED signaling system is used to indicate breathing events. A green indicator illuminates with each breath when the respiration rate is above 8 breaths per minute. A yellow indicator similarly illuminates with each breath when the respiration rate is 3 to 8 breaths per minute. A red indicator flashes rapidly when the breathing rate is less than 3 breaths per minute.

“We’re very proud to present ReDe Mask™ for sale pending approval by the FDA. We look forward to announcing and demonstrating the ReDe Mask™ at AORN 2016.” said Dr. Warren G. Young, President and COO of TereoPneuma, Inc.

The Anesthesiology meeting is convened annually by the Association of periOperative Registered Nurses (AORN) and is expected to draw more than 4,000 attendees.

About TereoPneuma

TereoPneuma is a privately held medical device company in San Diego, CA whose mission is to develop novel high technology products in the field of anesthesia. TereoPneuma is Greek for “observe breathing”. TereoPneuma's first product - the ReDe Mask™ - is a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation. Further, it provides a visual warning signal when no breath is detected for 7.5 seconds, and a more vivid visual warning signal when no breath is detected for 20 seconds. Detailed information on the Company is available at www.tereopneuma.com.
