TereoPneuma Presents the ReDe Mask™ at Medica 2016

SAN DIEGO, CA November 14, 2016 - TereoPneuma, Inc., a CA based company, has announced that the ReDe Mask™ will be exhibited at Medica 2016 in Düsseldorf, Germany on November 14-17.

The ReDe Mask™ is a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation. A three-color LED signaling system is used to indicate breathing events. A green indicator illuminates with each breath when the respiration rate is above 8 breaths per minute. A yellow indicator similarly illuminates with each breath when the respiration rate is 3 to 8 breaths per minute. A red indicator flashes rapidly when the breathing rate is less than 3 breaths per minute.

“We’re very proud to present ReDe Mask™ for sale on the international market. We look forward to announcing and demonstrating the ReDe Mask™ at Medica 2016.” said Dr. Warren G. Young, President and COO of TereoPneuma, Inc.

Medica is the world's leading trade fair for medicine and medical technology.

About TereoPneuma

TereoPneuma is a privately held medical device company in San Diego, CA whose mission is to develop novel high technology products in the field of anesthesia. TereoPneuma is Greek for “observe breathing”. TereoPneuma's first product - the ReDe Mask™ - is a disposable, single use oxygen face mask and respiration monitor that simultaneously provides supplemental oxygen to patients while also detecting exhalation and displaying a visual signal of each exhalation. Further, it provides a visual warning signal when no breath is detected for 7.5 seconds, and a more vivid visual warning signal when no breath is detected for 20 seconds. Detailed information on the Company is available at www.tereopneuma.com.
